

The exponential rise in businesses developing and embracing a Corporate Social Responsibility charter has seen an explosion in the number of software solutions designed to monitor, manage and support the CSR process. However, for those businesses who have invested in SAP, it clearly makes sense to incorporate CSR within the framework of SAP.

Invenio have developed a unique service that enables companies to incorporate their CSR requirements within SAP. The CSR Report is the first step to realising a fully integrated, business-wide CSR system that's fully managed, monitored and measured within SAP.

The Benefits of integrated CSR

A recent study published by the European Commission identified several important links between CSR and competitiveness. Günter Verheugen, Vice-President of the European Commission responsible for Enterprise and Industry highlighted this aspect of the report by commenting: *"We found the links between CSR and competitiveness to be most intense when looking at human resources, risk and reputation management, and innovation. Our analysis concludes that the biggest competitive gains will come to those enterprises who integrate CSR in their core strategy and purpose. Enterprises that deal with CSR as peripheral issue, mainly related to public relations, risk missing out on potential competitive gains."*

The CSR Report Service from Invenio:

Invenio offer a unique service that evaluates the effectiveness of your SAP system in supporting your CSR commitments across your extended enterprise. Where gaps exist we will formulate a plan to ensure that this is remedied, and we will work with you to ensure that every aspect of your CSR policy can be managed, measured, analysed and controlled from within your SAP system.

Our service is delivered in components and is tailored according to the specific content of your CSR Policy.

The service includes:

- Internal CSR commitments (i.e. human resources and talent management, work/life balance, health and safety and employee personal development and training).
- External stakeholder CSR commitments (i.e. customer, business partner and supplier management and local community inclusion and participation).
- Product and service CSR commitments (i.e. product development, manufacturing and production, quality management, warehousing and service operations).
- Financial and Business Reporting CSR commitments (i.e. financial accounting practices, accountability and transparency, regulatory compliance and risk management, business reporting and performance analysis).
- Environmental CSR Commitments (please see our brochure "Environmental Study" for further information).

For more information about the CSR Report please call us on **+44 (0)330 440 1800**.

What our Customers say:

"We find Invenio a very professional and trustworthy organisation and they add real value to the project rather than just 'box ticking' their way through the implementation."

Graham Terry - Director, SPP Pumps

"...we are proud to have you as a member of our team..." and "appreciate your commitment, hard work and dedication to achieve a successful and timely migration..."

John Santos – Head of Service Delivery, Siemens UK

"...we would not have been where we are without Invenio's proactive approach and dedication and we will extend our relationship further by actively considering Invenio for our offshore development ..."

Nick Murrey -IT Director, Neopost
